DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Kerrigan '745.

Kerrigan teaches a do pack harness which is structurally similar to the Applicant's claimed pet accessory. More specifically, the apparatus of Kerrigan includes a durable material, a harness attachment on the bottom side and a securing mechanism. At least one pocket is positioned on the top side. Regarding claim 9, the apparatus includes a leash attachment mechanism.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kerrigan '745 in view of Caditz '537.

Kerrigan does not teach the use of a durable material at least partially covers a pet's head. Caditz teaches an all purpose protective canine coat which partially covers a

pet's head. Regarding claim 13, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the apparatus of Kerrigan with a head cover, in view of the teachings of Caditz, in order to protect the animal's head from the weather.

Conclusion

Summary: Claims 1-17 have been rejected.
